The Masters Series: Techniques in Arthritis Surgery

Thursday-Saturday
April 30-May 2, 2015

Langham Huntington
1401 S. Oak Knoll Avenue
Pasadena, California

Course Director: Lawrence D. Dorr, M.D.

Presented by:
Department of Orthopaedic Surgery
USC Office of Continuing Medical Education

Keck School of Medicine of USC
Welcome back to The Masters Series. This is your invitation for its popular format which emphasizes technique and patient improvements. It is a practical course for practicing surgeons. Our mission is to provide you with new “tips and tricks” which you can use to modify your practice for better outcomes for more patients.

JOHN M. ITAMURA, M.D.
Associate Professor of Clinical Medicine
Department of Orthopaedic Surgery

JAY R. LIEBERMAN, M.D.
Professor and Chair
Director of the Institute of Orthopaedics
Department of Orthopaedic Surgery
COURSE DESCRIPTION

This is a three day interactive surgical demonstration of hip, knee and shoulder replacement surgery using computerized instrumentation in the operating room. This course allows health care professionals to observe joint replacement surgeons live and listen to their rational for techniques used during the surgery. Participants can ask questions in real time, see the state of the art tools used by master surgeons and discuss their impact in patient care and recovery. The didactic portion offers tips and techniques, as well as discussions covering cutting edge technology to help surgeons in the operating room and allows surgeons to discuss cases in smaller groups with experts, and discuss current issues encountered in daily practice in the care of joint replacement patients.

TARGET AUDIENCE

This course is intended for orthopaedic surgeons, fellows, residents and other medical personnel working in the field of orthopedics, as well as all allied health professionals who care for adults and seek to enhance their understanding of orthopaedics and treatment options to optimize management of their patients.

COURSE OBJECTIVES

At the conclusion of the program the participant should be able to:

• Identify enhanced techniques for improving performance in operations.
• Integrate computerized instrumentation in the operating room setting.
• Demonstrate better assessment indications in the election of patients for specific types of surgery.

FACULTY

KECK SCHOOL OF MEDICINE OF USC

FACULTY

DONALD B. LONGJOHN, M.D., F.A.C.S.
Assistant Professor of Orthopaedic Surgery
Arthritis and Joint
