Nurse Anesthesia

A graduate of the Nurse Anesthesia program will be able to:

1. Critically evaluate and synthesize relevant scientific literature and apply findings to advance culturally sensitive nurse anesthesia practice and improve patient access and outcomes.
2. Develop and demonstrate healthy, ethical and effective strategies for navigating difficulties in the practice, professional and learning environments.
3. Demonstrate personal and academic integrity in learning environments and employ self-reflection and cultural humility for continuous professional development.
4. Employ organizational, basic science and systems theories to promote and enhance patient safety, quality of care delivery and advance nurse anesthesia practice.
5. Apply leadership skills to address complex challenges in evolving health care systems and nurse anesthesia educational environments.
6. Collaborate and communicate effectively with related and divergent disciplines, patients, their families, populations and organizations.
7. Manage information systems and technologies for the application, evaluation and presentation of data and to enhance quality of care.
8. Apply relevant educational principles to motivate and educate individual patients, their families, diverse populations and colleagues.
9. Demonstrate leadership and scholarship through writing mastery, collaboration, and critical application of evidence in educational presentations, professional advocacy and scholarly publications.
