REDCap Database Solutions Workshop: Electronic Data Capture

REDCap (Research Electronic Data Capture) is a free, secure, web-based application designed for rapidly developing databases and surveys for research studies. Research groups can take a database or survey concept to production level in less than one day. REDCap is designed to comply with HIPAA regulations. It is not 21 CFR Part 11 compliant.

The system was developed by a multi-institutional consortium initiated at Vanderbilt University. It is currently being used across the nation on a broad spectrum of research studies.

- Friday, November 18, 9 AM to 1 PM
- 2001 North Soto St., Room #116, Los Angeles, CA 90089
