COURSE DESCRIPTION

This course offers a review of important and timely topics in the field of perinatal medicine. Based on a review of the literature, input from our own expert faculty, and analyses from past conferences, we are proud to offer a comprehensive program with topics that include: preeclampsia; genetics and genomics; postpartum care; nuchal translucency screening; thyroid disease in pregnancy; viral infections; electronic fetal heart rate monitoring; and a host of other topics. Lectures by USC faculty from the Keck School of Medicine and distinguished guest faculty from the University of California San Francisco and Duke University will outline controversies, discuss recent developments, and suggest recommendations. Participants have direct access to the speakers and ample opportunity for intensive question and answer post-lecture discussions.

TARGET AUDIENCE

The program was developed for gynecologists, obstetricians, perinatologists, neonatologists, nurses, nurse midwives and other allied health professionals. It is USC’s mission that this educational opportunity provide participants with objective, evidence-based clinical content, to incorporate into their practices and improve the clinical care and further the well-being of their patients.

COURSE OBJECTIVES

By the end of the course, participants will be able to:

• Assess current literature regarding the management of shoulder dystocia.
• Formulate a practical plan to screen for and manage preeclampsia.
• Describe and incorporate a treatment plan for thyroid disease in pregnancy.
• Apply practical tips to thoroughly assess and manage hypertension in pregnancy.
• Describe a practical approach to diagnosis and management of adnexal masses in pregnancy.
• Assess the controversies surrounding noninvasive prenatal testing.
• Implement a plan to manage obesity in pregnancy.
• Construct a practical algorithm for the management of placenta previa.
• Apply a standardized approach to fetal heart rate monitoring terminology, interpretation and management.
• Describe the risks and treatment strategies for venous thromboembolism in pregnancy.
• Understand the strategies to address common patient questions and concerns.
• Understand the use and contraindications for genetic tests in pregnancy.
• Manage postpartum care as a gateway to long term health.

ACCREDITATION STATEMENT
