GLOBAL LEARNING OBJECTIVES:
1) Integrate case presentations with critical evaluation of evidence-based literature to appraise novel medical treatment protocols and intervention skills so that patient management and outcomes can be continually and appropriately enhanced.
2) Critically evaluate evidence-based literature in order to incorporate appropriate best practices into the clinical care of patients with mood, anxiety, psychosis and other psychiatric disorders.
3) Examine patients and utilize current literature, hone diagnostic skills and update therapeutic knowledge so that patient management and outcomes are improved.

PRESENTATION OBJECTIVES:
Following participation in this activity, the participants will be able to:
1) have a familiarity with DSM-5 criteria for Gender Dysphoria in children.
2) identify how Disorders of Sexual Development contribute to Gender Dysphoria.
3) identify current management guidelines of Gender Dysphoria in patients with Congenital Adrenal Hyperplasia.

DISCLOSURE:
